 - Over 1500 customers—full order management and processing functions

Integration
TECHNOLOGIES

The Integrated Supply Chain is the first solution to deliver on the promise of an intelligent Solution integrating applications for growing and midsize businesses.

The Integrated Supply Chain is intelligent. The Solution integrates the data of target and source applications, with intelligent process flows and multi-map integration. The result? The right data, in the right place, at the right time in the right format. Employees now have the information they need, in real-time, to make better, faster decisions.

The Integrated Supply Chain is integrated. CRM, Accounting / ERP, On Demand Inventory, eCommerce, Telephony, Customer Support — all integrated and available today to configure and run as you wish. The result? Fragmented data once sitting on separate databases are now seamlessly integrated with each other.

The Integrated Supply Chain is your choice. Companies today need to select the "Best of Breed" applications to run their business on – and only the applications they need. Buying an "All-in-One" application commits the user to adopting the business processes and work flows of the "All-in-One" program. Changes? Well, that's a Professional Services issue. The Integrated Supply Chain significantly reduces your total cost of ownership (TCO).

Why Interweave?

Unify Data across your Enterprise and your Partners

With data now unified from your CRM, Accounting / ERP, Inventory and eCommerce applications, all departments, including sales, marketing, service, finance, inventory, order fulfillment, purchasing, etc., have the updated information they need to execute. Your employees no longer have to wait to access different systems, rectify inconsistent or inaccurate data. Instead, your employees view and share accurate data in real-time, leading to greater collaboration among departments and increased productivity across your business. Need to integrate with additional applications? A click away.

Customize to Support your Specific Business Processes

Interweave is the world's most customizable SaaS offering in the industry today. "Self-Service Configuration" allows the customer to define the relationship between the applications as applies to their business processes and work flow. If your business changes, simply change your configuration and select different configuration options.

Superior Value, an Affordable Solution and Built for the Enterprise

Behind all Interweave Solutions is the Interweave platform. Sarbanes/Oxley, Seas 70, Salesforce and Symantec certified. Primary/secondary servers automatically generated, full heart-beat-synchronization between primary/secondary servers, automatic failover and Rollback. Error Management and Monitoring, Connection Monitoring, Log Viewer; the list goes on and on. Interweave is a robust multi-tenant platform that can scale all day.
